

Objectives

This test assesses your ability to create a data visualization dashboard to analyze historical COGS resource utilization on a weekly basis.

Data

You will be provided with a dataset containing the following information:

- Time logs over 3 months period
- Utilization = time log in a billable project

Success Criteria

- The dashboard is visually appealing, clear, and easy to understand.
- All charts and visualizations are interactive
- The chosen visualizations effectively communicate the trends and insights in COGS resource utilization.
- The dashboard effectively highlights whether the target utilization rate of 80% is being achieved.

Deliverables

- The final interactive dashboard itself (format may vary depending on the chosen platform).
- Short Analysis of the data
